

# Python: Division

Check [Tutorial](#) tab to know how to solve.

## Task

Read two integers and print two lines. The first line should contain integer division,  $a // b$ . The second line should contain float division,  $a / b$ .

You don't need to perform any rounding or formatting operations.

## Input Format

The first line contains the first integer,  $a$ . The second line contains the second integer,  $b$ .

## Output Format

Print the two lines as described above.

## Sample Input 0

```
4
3
```

## Sample Output 0

```
1
1.3333333333
```
